

Get UDMI Site Model Metadata

This program facilitates getting metadata files from a source repository containing a UDMI site model.

Usage

```
$ ./get_udmi_sitemodel_metadata.py --help

      USAGE: ./get_udmi_sitemodel_metadata.py [flags]
flags:

./get_udmi_sitemodel_metadata.py:
  --destination_path: Destination path for the cloned repository
                      (default: './destination_folder')
  --repo_url: URL of the private Git repository
  --site_id: ID of the site

Try --helpfull to get a list of all flags.
```

Usage example

```
./get_udmi_sitemodel_metadata.py \  
  --destination_path ./udmi_sitemodels \  
  --repo_url git@github.com:faucetsdn/udmi_site_model.git \  
  --site_id COUNTRY-CITY-BUILDINGID
```
